Dear Recruiter,

About me:

I'm a Software Developer with an inherent zeal for quality and got 9+ years of professional experience in IT. I like to be among empathetic intellectuals first principle thinkers and live sustainably. I am looking for a job opportunity that has diverse international environment and high regard for creativity, passion and collaboration.
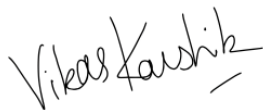

About my Work Experience:

At Walmart, I am responsible for Governance and Ingestion side of a Metrics Solution by Global Platform Team. I've developed, enhanced and maintained - K8s Operators, showback data, onboarding APIs and exporters in a multi-cloud environment with high scalability, reliability and availability requirements.

At ThoughtWorks, I developed cloud based scalable web-applications using Golang, Kafka, Redis, OracleDB, Docker, Kubernetes, Git, OAuth, CI/CD-GoCD, Rest APIs, Microservices. I developed a Saga library which is used for User-Migrations and has been one of the best features for my client.

Before ThoughtWorks, I had worked majorly in C#, .Net Core and developed REST-APIs, services and did a lot of refactoring. I'm excited to learn and explore new technologies and solve real-life problems to help people.

Thanks.

Sincerely,

Vikas Kaushik
